

Wednesday Standup

Entire Team

- endpoints are almost done

Backend (Kevin, Teresa):

Kevin

- has all of the logic down for tag crates
- all logic for finding by tag
- continue to endpoint definitions

Goal

- work on portfolio
- finished find by tag id
- get by date range
 - linkedhashmap with strings

Teresa

- will work with Chris on getting the database

Goal

- will start with Jenkins
 - place it on Port 8080
 - EC2 will run on 8085
- portfolio
- automation

Frontend (Andrew, Uriah, Chris):

Frontend Team will need to discuss:

Chris

- Login and Register working on new database
- doing a bit of spring studying
- reading up on angular on how to implement some features in update user
- still need to work on nav bar

Andrew

- mostly focused on front end
- will have a hand in nav bar
- will start adding class labels
- explore modular development

Uriah

- working on single image component
- ran into an issue when pulling from interesting times front end
 - gets a lot of errors
